Technical Support | Developer Operations | Quality Assurance

Summary

Self-directed software builder transitioning from eleven years of full-time arboriculture. Turns reported failures into reproducible tests and usable fixes; combines released personal projects with technical support and customer-facing field operations.

Technical Skills

Python, SQL, Git, GitHub Actions, pytest, Linux, Windows, HTTP/JSON APIs, WebSocket, TCP/IP, DNS, NAT; issue reproduction, regression testing, release packaging, technical documentation.

Self-Directed Projects

About 13 years self-directed | Career transition began June 2026

- Built Flywheel, a Python/Flutter AI workstation installable from PyPI, Homebrew, Scoop, or a Windows installer, with Rowan orchestration, model routing, and permission-checked tools.
- Enumerated all 324 combinations of a defined evaluation record into seven verdicts, separating provider failures and missing evidence from model-quality scores.
- Built Articulate writing tools, Accountable Surface approval interfaces, and the Daylight Commons browser extension; each supplies inspectable reports and records for troubleshooting and review.

Freelance Technical Writer | Independent projects | Began 2017

- Wrote implementation guides, API documentation, and release notes for developers and customers.

Employment

Arboriculture and Field Operations | Legendary Tree

Seattle area | April 25, 2015 to June 2, 2026

- Turned site assessments into estimates, proposals, and workable job scopes; coordinated clients, crews, and vendors so teams understood access constraints, timing, and hazards.

Technical Networking Support | Stream/Convergys | 2014 to 2015

Xbox/Microsoft product contract | Wilsonville, Oregon

- Resolved Xbox connectivity problems across TCP/IP, DNS, NAT, firewalls, and routers; documented troubleshooting steps for consistent support handoffs.

Selected Open-Source Contributions: 6 Merged

- Free Law Project #820: documented runnable database-free tests, giving contributors a focused check path without starting the full database-backed stack. Merged.
- Hebbian Robotics #157: added schema-drift coverage that flags mismatches between queryable episode columns and reserved names before incompatible changes go unnoticed. Merged.
- Voxwire #44: added offline regression coverage for a six-event degraded voice turn, matching persisted audio and JSONL records to emitted events. Merged.

Credentials, Training, and Education

Qualys Certified Specialist: Policy Audit, Custom Assessment and Remediation, VMDR, KCS, TotalCloud, EDR. Microsoft Applied Skills: cloud AI security, Entra identity/access, Azure storage security, Azure DevOps pipeline security (95% assessment). Cisco Ethical Hacker course certificate. Coursework: Google SecOps; LFD121 secure software; advanced SC-100 security architecture; Claude API, Claude Code, advanced MCP; BlueDot AGI Strategy. Full record: harperz9.github.io/cv.html.

High School Diploma | Wilsonville High School, Oregon | 2013
